

SPIRIT IN MATTER

Lecture Series given by Johannes Schuster

The *Spirit in Matter* Lecture series explores the nature and role of ARTIFICIAL INTELLIGENCE, seen through the lens of Rudolf Steiner's Spiritual Science.

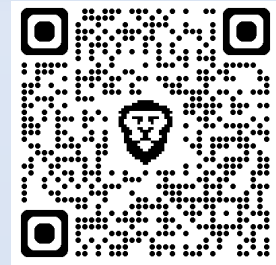

Where: at the Michael Center, Warranwood.

When: every second Wednesdays, 7 - 8.30 pm, during school terms

Cost: By Donation. **Enquiries:** call Johannes on 0414 724 587

For more details and to register for the recordings go to:

www.spiritinmatter.org

Last Term's Lectures traced the historical divorce between spirit and matter, which enabled the materialistic stream that produced today's technological landscape, including AI.

This term's lectures focus on the spiritual nature of the Cosmic and Human **CREATIVE PROCESS:**

"Reclaiming our Creative Sovereignty from the Machine"

ARTIFICIAL INTELLIGENCE can write novels, compose songs, illustrate, animate, and propose designs across almost every artistic field —which is only the beginning of the exponential advances to come. This inevitably raises fundamental questions about the nature of what it means to be human, as well as the nature of creativity itself. Looking at these questions from a spiritual science perspective can be of enormous help to recognize and reclaim our creative sovereignty. The extent to which human beings can do that will be the key in who will be serving whom.

Lecture 1: Wed. 14 th October 7.00 - 8.30 pm	"Who Came first: the Earth or the Human Being?" A (very short) spiritual history of Humanity
Lecture 2: Wed. 28 th October 7.00 - 8.30 pm	"The Archetypal Creative Process" What is the Difference between Manifestation and Creation?
Lecture 3: Wed 11 th November 7.00 - 8.30 pm	"As Above -So Below" The Plant's Yearly Growth Cycle as Mirror of the Macrocosmic Creation Process
Lecture 4: Wed. 25 th November 7.00 - 8.30 pm	"Artificial Intelligence versus Moral Action" Human Creativity as Transformative Deed
